1. *Pharmaceutical industry* – The pharmaceutical industry is the largest of the three industries, with sales of \$10.5 billion in 1997. It is the only industry that has not experienced a decline in sales since 1990. The industry is dominated by a few large firms, with the top five firms accounting for 40% of sales. The industry is characterized by high R&D expenditures, which are a key source of competitive advantage.

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion. The number of people aged 65 and over is expected to increase from 200 million to 400 million. The number of people aged 15 and over is expected to increase from 3.5 billion to 4.5 billion. THE HISTORY OF THE UNITED STATES

The history of the United States is a story of growth and development. It begins with the first settlers who came to the continent in search of a new home. These early pioneers faced many hardships, but they persevered and built a nation that would one day become a world power. The story of the United States is a story of the struggle for freedom and the pursuit of the American dream. It is a story of the men and women who have shaped the course of our nation's history, from the founding fathers to the presidents of the present. The history of the United States is a story of the triumph of the human spirit over adversity and the power of unity in the face of challenge. It is a story that inspires and motivates us to strive for a better future for ourselves and for our country.
